1 [Please swear in my testimony. When a body's intestinal system gets backed up it becomes poisoned. Without intervention, the body will die. The nuclear industry was poison at it's inception. It has done nothing but destroy life and lives ever since. It deserved to die a long time ago. No intervention is deserved, no toilet is appropriate. Stop making the waste and destroying our future. Leave the waste on site. Perhaps when you all grow up we can find a responsible solution. Francene McClintock]
